TAILORMADE TEAM WEAR SOLUTIONS

**A GREAT LOVE FOR SKIING
A PASSION FOR ENGINEERING!**

The combination of a great love for skiing and a passion for engineering has resulted in the high-quality brand VISOR. Believe it or not, our initial intention was not to make the best ski garments. We actually wanted to know all about the best technical materials! Our

passion for engineering led VISOR to start an innovative research project to find the highest quality and most functional ski materials available. Our research results formed the basis of our brand and are still the key feature of our garments.

QUALITY

Quality is of course the most important aspect. The clothing is used intensively for 4 to 5 months and must meet the highest quality requirements. It must also be ensured that the materials used have a high color fastness. VISOR works together with the high-quality brand Toray-DERMIZAX and Thinsulate insulation. These materials have proven themselves for a long time in the market and are well known for their extreme quality.

VISOR Teamwear is specially designed for professional, intensive use by ski-schools, ski-clubs and snowsports organizations. Our garment is designed, developed and manufactured in Europe by ourselves. This makes us very flexible and allows us to respond directly to specific wishes of our clients. Individual wishes like modifications to length, name windows, logos, etc. are no problem at all.

INDIVIDUAL DESIGN

In addition to the quality of clothing, it is important that ski schools and mountain organisations create their own appearance and identity. High quality clothing combined with a suitable design in own selected colors is a specific requirement for this. VISOR goes a step further by giving ski schools, snowsport or mountain organisations the opportunity to create their own exclusive design. The customer's wishes are translated by VISOR engineers into tailor-made garment, specially designed for the customer. The individual designs can be re-ordered when necessary.

Every Ski Team wants a unique look, our mission is to realize this!

CONTACT

VISOR works successfully together with numerous international ski schools. Personal attention for each client is very important to create a good cooperation. A personal visit from the VISOR team is the first step for good partnership. We would also like to visit your ski school, snowsport or mountain organisation to discuss a possible cooperation.

For more information, an appointment can be requested without any obligation at:
teamwear@byvisor.com

THE COLORS AND THE IDENTITY OF OUR SKI SCHOOL MUST BE CLEARLY RECOGNIZABLE IN OUR CLOTHING. TOGETHER WITH VISOR WE HAVE DESIGNED A PERFECT COMBINATION SO WE ARE RECOGNIZABLE TO EVERYONE.

OUR EMPLOYEES ARE VERY SATISFIED WITH THE FIT AND COMFORT OF THE CLOTHING. THE ROBUST DERMIZAX MATERIAL ENSURES EXCELLENT, LONG-LASTING PROTECTION AND QUALITY!

THE COOPERATION WITH VISOR GOES BEYOND JUST SUPPLYING CLOTHING. FROM ORDER TO DELIVERY ALL AGREEMENTS HAVE BEEN FULFILLED!

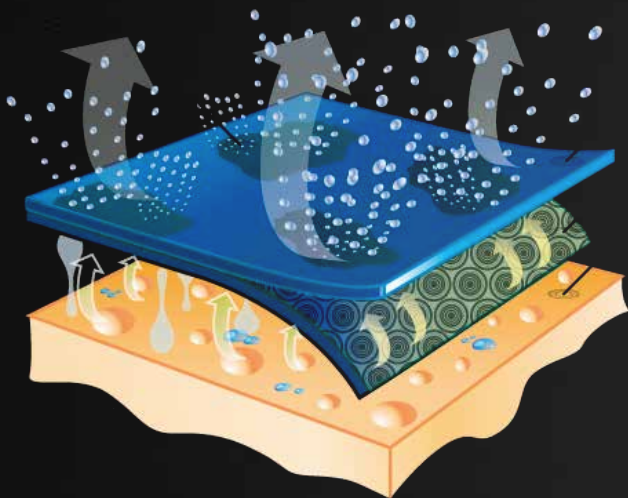

AFTER HAVING TRIED DIFFERENT BRANDS, WE HAVE NOW FOUND A PARTNER WHO PROVIDES US WITH THE QUALITY AND SERVICE WE CAN RELY ON FOR THE FUTURE

WE HAVE TESTED VISOR CLOTHING FOR THE FIRST TIME IN ALL WEATHER CONDITIONS TO OUR SATISFACTION. AFTER THIS, WE ENTERED INTO A PARTNERSHIP WITH VISOR.

SOME OF OUR PARTNERS

**WE ENGINEER, ADJUST, TEST AND RE-DESIGN
TILL WE FIND THE PERFECT OUTCOME
FOR YOUR PERFORMANCE GEAR!**

MATERIAL

VISOR only uses specialized brand materials that have been thoroughly tested to the highest standards. In themselves, these materials are not always the most comfortable for active skiing. However, VISOR develops and combines these materials in such a way that their unique properties are fully utilized without sacrificing comfort. To achieve the optimal relationship between performance, quality and comfort, VISOR uses an innovative test system. Based on the unique qualities of each individual material, these are combined and tested until the most optimal combination is achieved. This technical composition forms the basis for the final VISOR product.

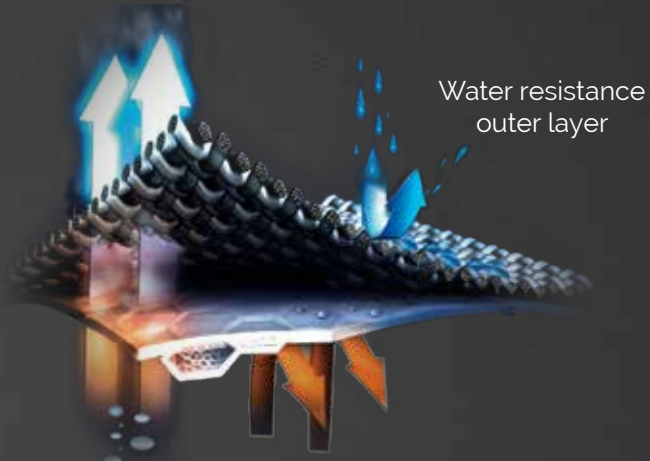

All garments developed by VISOR are intensively tested for long periods under the most extreme conditions. Finding the best combination of the highest quality materials is our specialty, the many tests under extreme

conditions prove that! This combination of engineering with the best materials and the physical testing of our clothing is crucial to achieve the best end result. Together they form our technically advanced concept. The physical performance and comfort level of each product is first tested independently and then compared with the results of our internal technical examinations and measurements. We develop, adapt, test and design again until we have found the perfect composition of a VISOR product!

Technical development does not stop if the right balance between performance, quality and comfort is achieved. Extra options and gadgets are designed and developed to make your ski experience as complete as possible. All VISOR products come standard with many options to store your personal belongings or to protect you against the elements.

DESIGN YOUR OWN HANDMADE HAT

In collaboration with Poederbaas we give you the opportunity to complete your design with a handmade Poederbaas hat. This can be an existing model that fits well with the outfit you have chosen, but it can also be a model that you put together yourself using the beanie tool.

How to make your own designed hat?

1. You can indicate in which colors you would like the hat.
2. Tell us how many pieces you would like to order.
3. You will receive a digital design of your hat for approval.
4. The hat will be delivered together with your order.

Personalize your clothing
VISOR gives you the opportunity to personalize your clothing and to provide your own logos, texts or designs. You determine the location and size of each visual. The visuals are embroidered or printed on your clothes according to your wishes. Embroidered items are always guaranteed completely waterproof by VISOR!

We would like to discuss all possibilities with you personally so that your design can be made exactly to your wishes.

For more information, an appointment can be made without any obligations through: teamwear@byvisor.com

**VISOR VIFT © SYSTEM - FIT OPTIONS
PERFECT FIT FOR ALL!**

With all VISOR Teamwear jackets and pants, the arm length and leg length are adjustable. This creates a perfect fit for every figure.

VIFT® SYSTEM

Everyone is unique, so do not make something standard! Hearing the demands of each individual body shape, VISOR developed the integrated VIFT® system (VISOR Innovated Fit Technology). Thanks to an inventive method, the VIFT® system ensures a perfect fit and optimal freedom of movement. VISOR uses extremely high quality materials that adapt to your body shape. This allows you to move freely and comfortably under all circumstances!

No excuses, by VISOR
